

IP21

Slimline 15 Wide

Slimline 15 Wide is an aluminium profile with a clean-lined design. Surface mounting on a ceiling, on a wall, or beneath worktops. A mounting bracket and end pieces with or without wire opening are available as accessories. The profile can be used with all Airam's 12 V and 24 V LED strips and with connector ranges compatible with them. The profile has a high structure, which diffuses the LED strip's sharp light, making it ideal for applications where its surface remains visible.

- Anodised aluminium body, transparent or opal UV-protected polycarbonate diffuser.
- When used with the diffuser and end caps available as accessories, the profile meets the IP21 protection class requirements.
- The profile is available in 1 m and 2 m lengths and with a clear or opal diffuser.
- End caps and mounting brackets are available as accessories.
- Custom-made profile lengths (max. 6 m) are available on a project-specific basis.
- Check the compatibility table for our LED strips and profiles.
